

Continuing Education Course Description

MAGNETIC RESONANCE IMAGING (MRI):

The total length of the MRI course is 24 weeks. This will include both a classroom and clinical component. The class will meet bi-weekly (12 times) on Wednesday nights from 4:30pm-6:30pm. This course is hybrid, to include both in person instruction as well as online via zoom. Clinical time is offered days and may vary depending on the clinic site. **There is a minimum requirement to complete 24 hours of clinical time per week.** Clinical experience is 24 weeks and is geared to provide an opportunity to earn competencies for ARRT advanced modality certification. There is no guarantee of completion of all ARRT requirements. Competency completion is heavily dependent upon clinical volume and intern motivation. The course is designed to instruct technologists on theory and processes used in MRI. Applicants are required to have completed a cross-sectional anatomy course prior to admission. Course space is limited. There are **no clinical only** options available.
