

## Continuing Education Course Description

### **MAMMOGRAPHY (M):**

The total length of the Mammography course is 16 weeks. This will include both classroom and clinical components. The class will meet once a week for the first 10 weeks (10 times) on Thursday nights from 5:30pm-7:30pm. This course is hybrid, to include both in person instruction as well as online. Clinical time is only offered during daytime hours and may vary depending on the clinical site. **There is a minimum requirement to complete 16 hours of clinical time per week.** Clinical experience is 16 weeks and is geared to provide an opportunity to earn competencies for the ARRT Mammography certification. There is no guarantee of completion of all ARRT requirements. Competency completion is heavily dependent upon clinical volume and intern motivation. The course is designed to instruct technologists on theory and processes used in Mammography, as well as meet the MQSA requirements. Course space is limited. There are **no clinical only** options available.

### **All topics covered follow ARRT content specifications:**

- Patient Care
- Image Production
- Procedures
